MESS- UND SENSORTECHNIK

Geometry: Monocoque strain structure with no moving parts.

The FLF310 depicted measures force and torque in the same axis with minimal cross talk providing user friendly outputs for direct measurement without mathematical manipulation.

Each channel may be calibrated bi-directionally. The version of the transducer depicted was developed for an OEM producing texture analyser machines (rheometers) for use in the food process industry.

We are happy to design variants of this loadcell to meet your specific requirements. Variants may include different combinations of force and moment axis e.g.  $F_x M_z$ ,  $F_y M_x$ ,  $F_z M_y$  etc.

## ■ Notes

1. AL = Applied load.
2. RL = Rated load.
3. Temperature coefficients apply over the compensated range.
4. Values apply to force and moment in all load combinations.

## ■ Connections

The FLF310 is fitted with 2 metres of PVC insulated 9 core screened cable type 7-1-9C. The screen is not connected to the loadcell body.
